

Find a Project

Find Your Project

Choose your global health topic, health care specialty, location and/or assignment length to find a project that's just right for you! We encourage you to explore the topics and specialties covered by HVO programs and projects. If you don't see your health care specialty or have questions about the projects listed, [contact us](#) – we may have a project that will match your qualifications or visit [Our Programs](#) page.

Please note: projects listed with assignment length 1-4 weeks may have specific length requirements that fall in that time frame (for example, the project may require a 2 week stay). Further details can be found on the program page or by contacting the HVO office.
